Helena Oprandi

PhD Researcher in Economics
University of Southern Denmark
Odense, Denmark | helop@sam.sdu.dk
LinkedIn | Website

Research Interests

Economic history; economics of creativity and cultural industries; industrial organization; creative markets; applied econometrics; longitudinal and historical data analysis.

Education

University of Southern Denmark (SDU), Odense, Denmark *Sep. 2026–Aug. 2029 (exp.)*
PhD in Economics
Research within the Carlsberg Foundation-funded project *The Age of Creativity.*
Supervisor: Prof. Karol J. Borowiecki; Co-supervisor: Julius Koschnick.

University of Verona, Verona, Italy *Oct. 2023–Sep. 2025*
MSc in Economics and Data Analysis, summa cum laude
Thesis: *Investigating the Financial Effects of Twitter Sentiment Through Machine Learning and Transformers: Evidence from Elon Musk's Tweets.*

University of Bordeaux, Bordeaux, France *Aug. 2024–Dec. 2024*
Erasmus Exchange – MSc Economics and Data Analysis
Coursework in applied econometrics and data analysis.

University of Bergamo, Bergamo, Italy *Sep. 2020–Jul. 2023*
BSc in International Business and Financial Markets, 92/110
Thesis: *The Aquafil Case: Sustainable Fashion and Business Sustainability.*

Research

Specialization and Scale in a Creative Market: The Industrial Organization of Nineteenth-Century Music Publishing
Working project

- Studies how market expansion affects publisher entry, concentration, specialization, diversification, and composer–publisher relationships.
- Uses *Hofmeister XIX*, a contemporaneous catalogue of music publications covering 1829–1900, to construct a longitudinal publisher-level dataset.
- Examines publisher concentration, specialization across musical categories, composer portfolios, and publication prices.
- Uses IMSLP as a supplementary source for work classification and matching, while retaining Hofmeister as the basis for the historical market sample.

MSc Thesis: Investigating the Financial Effects of Twitter Sentiment Through Machine Learning and Transformers
University of Verona, 2025

- Investigated the relationship between sentiment in Elon Musk's tweets and financial market outcomes using natural language processing, transformer-based models, and quantitative analysis.

Publications

Research Experience

Global Fellow, *Nottingham Economic Review* *Jun. 2025–Jun. 2026*
Research and publication of articles on economic and policy topics.

Academic Affairs Assistant, *University of Verona* *Mar. 2025–Jun. 2025*
Supported academic coordination and research-related initiatives.

Conference Papers and Presentations

- *Specialization and Scale in a Creative Market: The Industrial Organization of Nineteenth-Century Music Publishing.* Proposal for the 2027 Annual Conference of the Economic History Society.

Research Methods and Technical Skills

Econometrics: Regression analysis, panel data, time-series analysis, causal inference, predictive modelling.
Quantitative methods: Machine learning, natural language processing, transformers, data cleaning and preprocessing.
Programming: Python, R, MATLAB, VBA.
Other: LaTeX, Power BI, Microsoft Office, Google Workspace.

Languages

Italian (native); English (C1); French (C1); Spanish (B2).

Other Professional Experience

Import Specialist, Valtex S.p.A., Bergamo, Italy *Jan. 2021–Sep. 2023*
International logistics, customs documentation, and regulatory compliance.

Junior Accountant, Tacchini & Bezzi s.r.l., Bergamo, Italy *Jan. 2018–Jun. 2018*
Accounting, invoicing, and administrative support.
